

Programme préliminaire

1 Lundi

09h-10h30 **C. Rétoré** : Exposé introductif

11h-12h30 **A. Lecomte** : Exposé introductif

14h-15h **M. Moortgat** : Lambek calculus with Grishin interactions

15h-16h **A. Ranta** : Parametrized Grammar Modules for Romance Languages

16h30-17h30 **De Groote** : Abstract Categorical Grammars: definition and formal properties

2 Mardi

14h-15h **R. Muskens** : Abstract syntax, concrete syntax, semantics, and natural language

15h-16h **M. Kanovich** : Lambek Calculus and its generalizations: Expressiveness, Complexity

16h30-17h30 **A. Lecomte** : t-b-a

17h30-18h30 **M. Abrusci** : Remarks on relationships between logic and linguistics

3 Mercredi

09h-10h **P. Blache** : Beyond generative grammar : the role of constraints toward description grammars

10h-11h **A. Abeillé** : Can we model coordinations (or not)?

11h30-12h30 **C. Rétoré** : t-b-a

4 Jeudi

14h15h **D. Bechet** : Parsing Lambek calculus using partial composition

15h-16h **G. Perrier** : Interaction Grammars and their implementation

16h30-17h15 **P. Thevenon** : Typage principal avec deux flèches

17h15-18h **V. De Paiva** : Glue Semantics for Linear Logicians

5 Vendredi

09h-10h **C. Casadio** : Non commutative linear logic vs. pregroup grammar

10h-10h45 **A. Preller** : Compact 2-categories, a semantical interface for Natural Language Processing

11h15-12h **G. Pulcini** : Permutative Logic
